

The Carbon Chronicle

VOLUME 33: No. 9

Authorized as Second Class Mail, Post Office Department, Ottawa
ACME, ALBERTA, THURSDAY APRIL 8th, 1954

\$1.50 a Year; 5c a Copy

The Carbon Canadian Legion No. 161 wishes to thank all the organizations and people who contributed so generously to the Provincial Legion Polio Drive which concluded recently. We are happy to announce that the objective was greatly surpassed. The following contributions were received from organizations:

Ladies Auxiliary No. 161.....	\$30
Carbon Lions Club.....	\$15
Carbon I. O. D. E.....	\$15
Pope Lease W.I.....	\$10

A total of \$175 in all was collected.

We are pleased to say Susan Hoivik is home from hospital and making a very satisfactory recovery.

BORN—To Mr. and Mrs. Higginbottom (nee Margaret Schmierer) an 8 lb. 7 oz. son, Reginald Bruce April 3rd in Elnora hospital.

Ione Coates served with two of the casts of one act plays staged at the Olds School of Agriculture recently. She was also prompter for the play "Mad Breakfast" and then served the dual roles of prompter and make up artist in the (Rope).

Mr. R. Neher is again a patient in Calgary hospital, after recently having been hospitalized.

CANADIAN CANCER SOCIETY
DRUMHELLER, ALBERTA

L.S. Donald Langley R.C.N., stationed at Esquimalt is spending a 30-days leave with his mother at Carbon. Don enlisted in the Navy in January, 1953, leaving at once for Halifax.

Mrs. John Forsch is a patient in the Drumheller hospital where she will undergo another operation.

Mr. and Mrs. Chris Diede Sr., Mr. and Mrs. Chris Diede Jr. and Allan, Mr. and Mrs. John Diede, Mr. and Mrs. Fred Harsch motored to Didsbury to attend the recent wedding of Richard Harsch.

The Carbon School hockey beat Three Hills school team 10—1 on Monday night.

POPE LEASE

On Friday a Whist Drive was held in the Hesketh Hall by the Junior Red Cross. Several articles were made by the pupils and auctioned off by Carl Ziegler. Raffle tickets were sold on the Shell picture made and donated by Douglas Neilson was won by Stella Steinbach. Whist prize winners were as follows: Ladies first, Mrs. Doug. Pallesen; Consolation, Mrs. Earl Fraser; Gents first, Bill Church; Consolation, Wilson Redgwell. Total proceeds of \$60.25 were sent to the Junior Red Cross, Calgary.

Mr. and Mrs. Dick Young of Dunphy have left for Vancouver to take up residence, where Mr. Young will be employed in his father's business.

Miss Hilda Walker and Mrs. George Williams of Calgary were visitors at the home of Mr. and Mrs. George Walker.

Only by costly research can the cancer riddle be solved. Last year the Canadian Cancer Society supported, partly or wholly, 75 research projects on cancer.

Most of the support for cancer research and welfare work in Canada comes from the voluntary contributions of Canadian citizens through the Canadian Cancer Society.

"SPEED"

By Dr. Charles S. Cameron
Medical and Scientific Director,
American Cancer Society

Ever since that distant day when man first invented the wheel, the desire to ease our burdens by inventive genius has taken a turn toward greater speed.

Volta and others who discovered the mysterious effects of electromagnetism opened new pathways to speed. The mighty forces of steam, the gasoline internal combustion engine and finally shattering of the time barrier by jet propulsion give rise to the thought "What's the hurry?"

Many critics contend that speed, especially on our highways, is a great waste of lives. Yet there is one instance in which it may do just the opposite. It might save thousands of lives each year—the lives of those who have cancer.

The only "wonder drug" that can save the lives of eight out of every 1,000 apparently healthy Canadians who nevertheless have cancer is "speed".

Speed, meaning early detection and widespread public participation in the Cancer Society's detection program, already is showing results. A study in Vermont revealed that the number of patients found with early—and controllable—cancer has nearly tripled in the past ten years. A Mayo Clinic survey indicated that women are discovering breast cancers in earlier, less dangerous stages. A Metropolitan Life Insurance Company study reported an 11 per cent decline in cancer death rate among women policy holders in a 10-year period.

The need to detect, diagnose and treat cancer early is only one aspect of the urgency of cancer control. There are others. We need to apply speed in research and in providing services for the cancer patient. These too are going forward.

Above all, and quickly, we need to recognize cancer as a threat which is growing to the proportions of a national emergency, and to meet it as we have always met national emergencies by giving of ourselves and our means to its defeat.

Swalwell

Friends and relatives gathered at the home of Grandma Wacker on Thursday, April 1st to wish her many happy returns of the day on her 94th birthday. She received many gifts, cards and a bouquet of flowers.

During the past year she has crocheted a tablecloth as well as other small articles. Her health has been ailing the past three months but we are glad to see she is feeling better and crocheting again.

There was a small turnout at the H. & S. meeting on Tuesday night, due partly to the cold, miserable weather.

F.W.U.A. is to meet on Tuesday evening at the home of Mrs. Alice Empey.

Colds and 'flu are running wild in the district, quite likely due to the changeable weather we are having. Someone should inform the weatherman spring is here.

HOLY WEEK SERVICES

Holy Week services in Christ Church, Carbon are:

Monday—Holy Communion at 11 a.m.

Tuesday—Litany and Address at 8 p.m.

Wednesday—Holy Communion at 11 a.m.

Thursday—Litany and Address at 8 p.m.

Good Friday—3 hour Service, 12 to 3 p.m.

Easter Sunday—Holy Communion at 12:00.

REV. G. B. HOTCHKIS

Cancer of the skin is the commonest form of cancer in men. It can be detected early and often completely cured.

Cancer is not contagious. It can appear at any age, but usually in older people.

Record Road Construction Planned

A record-breaking total of \$18,131,390 will be spent on Manitoba roads and highways in 1954, it was announced in the Legislature by Hon. W. Morton, Minister of Public Works.

The summer program calls for at least 180 miles of new pavement and more than 1,000 miles of grading, gravelling, and other work on roads throughout the province.

For the second year in succession, all expenditures for highway construction will come from current revenues. Here are the sources: Voted by the Manitoba Legislature, \$14,631,390; carry-over from the 1953 construction program, \$1,000,000; payable by the Federal Government as its share of Trans-Canada Highway construction in Manitoba, \$2,500,000.

NARROW ESCAPE

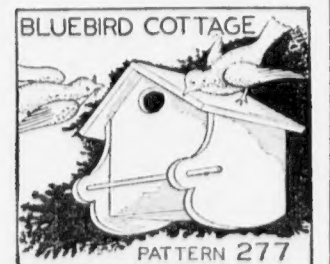

CRANBROOK, B.C. — A cork-shooting toy pistol will also fire rifle bullets, four-year-old Alan Reekie discovered. Finding a live bullet, he put it in the plastic toy and pulled the trigger. The bullet grazed his lip and cheek and buried itself in the ceiling.

ITCH RELIEVED IN A JIFFY
or money back
Very first use of soothing, cooling, liquid D.D.D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itch troubles. Greaseless, stainless. 43c trial bottle must satisfy or money back. Ask your druggist for D.D.D. PRESCRIPTION.

Home Workshop

Plant stands come in a wide range of styles and today's pattern gives directions for making two entirely different types. The shadow box which will hold three four-inch pots hangs on the wall to brighten up a corner of most any room in the house. While the terraced stand was designed for a bay window it will fit nicely into any sunny angle. It is three feet ten inches high with the top shelf fourteen inches long and the bottom shelf thirty inches long. You get the green and white rope effect which borders the shelves by tracing the sawing and painting directly onto the wood. This is a well-balanced stand that is suitable for small pots of African violets or large geranium plants. Price of pattern 366 is 35c post-paid.

This bluebird house is a perennial favorite both with us bird lovers who like to make them and the bluebirds that like to use them. The pattern also gives directions for a popular wren house. My husband and I have made many of these two styles and feel well repaid each season as they are always occupied by seemingly happy families. I think a great deal depends too upon the roof overhang at the gable ends of the house and the garage is the favorite place for house wrens. High in a tree standing apart in the orchard or a corner of the lawn seems to be preferred by bluebirds. Pattern 277 with both designs will be mailed the day order is received. The price is 35c.

Funny and Otherwise

An angry motorist drove his baby car back to the works. "I want all the wheels taken off," he said, "and replaced by four big ones. I'm not going to have every dachshund that passes barking through my window."

Said one man to another: "You didn't laugh at Smith's joke. I thought it was quite a good one."

"It was a good one," replied the other, "but I can't stand Smith. I shall laugh when I get home."

A village football team had been playing very badly, so it was a great surprise to one of their supporters when he learned that each player had been presented with a pocket-lighter. "Why a pocket-lighter?" he asked a friend.

"Well," was the reply, "they've lost all their matches."

"So you wish to marry my daughter? Do you think you're suited?"

"I certainly do, sir. With her charm and your money, we were made for each other."

A revivalist said to his congregation: "There is a man among us who is flirting with another man's wife. Unless he puts a dollar in the collection box, his name will be read from the pulpit."

When the collection box came in there were six dollar bills in it, and one for 50c with a note pinned to it, saying: "This is all the cash I have, but I will send the other half dollar on Wednesday."

A dear old lady entered a bookshop and approached an assistant.

"I want a book for my nephew," she said.

"Certainly, madam," was the reply. "Any special subject?"

"Well," said the old lady, "he's just started work as a railway porter, and I want to help him. I think I'll send him that book called 'Hints on Successful Platform Speaking'."

Two women were chatting over tea.

"Yes," said one, reminiscently, "I fell desperately in love with my dear husband at first sight. I remember it just as though it were yesterday. I was walking along the front at Brighton with my father, and he suddenly pointed to him and said, 'There, my dear, goes a man worth \$200,000!'"

Client (after being suddenly slapped on the face): "What's that for?"

Crystal-Gazer: "That's for kissing my husband next Friday night."

Third Stockton Well Big Gas Producer

DRUMHELLER, Alta.—Indications for a brighter future for the holders of units in the Stockton Syndicate took the right turning as their well blew in as a gasser on property about two miles south of the city recently.

The gasser, which drew the attention of hundreds of members of the community, in the initial "blow in" gave indications of being twice the producer of the success on the Bib Vogan property finally rated at 44½ million cubic feet per day.

Fred Stockton, founder of the syndicate made up for the most part of local investors, felt that new well proved the field as a top-ranking gas producer.

Future activities of the company, which will be officially announced within the next several days, may follow one of many courses. There is no chance, however, of the two wells providing the natural gas to be used in a few months to heat homes and business places in the city, it was learned.

Conservation Board policy, it was pointed out, will require that the gas to be used here will be taken as a waste product, then refined, from the field on the other side of the river to the Stockton holdings.

Stockton, who has been exceptionally keen on the future of the holdings of his associates, feels that in the remaining land other

gassers, each as potent, will be found. Piping the gas to other centres, seems highly likely at the moment.

Members of the Stockton Syndicate, as the first pangs of amazement wore off, felt that their holdings in the near future would expand to great proportions.

REGINA SCENE OF 1955 BRIAR CURLING PLAYOFF

The next Macdonald's Briar curling championship will be held in Regina in the first week of March, 1955. W. C. Boyd, Regina, is the new president of the Dominion Association. Boyd, who was elected at the annual meeting held March 3 in Edmonton, succeeds Emmett Smith of Bourlambaque, Que., who now goes up to the honorary president's seat. It is Regina's Golden Jubilee in 1955.

NEW BAND

LLOYDMINSTER, Sask.—After almost 20 years without a band, this town has a new organization called the Lions Community Band. Under bandmaster Bob Bourassa they held their first public concert in February.

Fiery, Itching Skin Gets Quick Relief

Here is a clean stainless penetrating antiseptic oil that will bring you speedy relief from the itching and distress of Eczema, Itching Toes and Feet, Rashes and other itching skin troubles.

MOONE'S EMERALD OIL not only helps promote rapid and healthy healing in open sores and wounds, but boils and simple ulcers are also quickly relieved. In skin afflictions—the itching of Eczema is quickly eased, Pimples, skin eruptions dry up and scale off in a very few days.

MOONE'S EMERALD OIL can be obtained at any drug store satisfaction or money back.

3 different Cheese-flavored Treats from One Basic Dough!

NEEDS NO REFRIGERATION!

Clever one-oven tricks with FLEISCHMANN'S YEAST!

One dough—one oven—three kinds of flavor-thrilled baking! It's easy to be a whiz when you start with Fleischmann's Fast Rising Dry Yeast. Risings so sure, so fast—results so light and appetizing! If you bake at home, be sure you have plenty of Fleischmann's on hand.

BASIC CHEESE DOUGH

Scald

- 1½ cups milk
- 3 tablespoons granulated sugar
- 2 teaspoons salt
- 3 tablespoons shortening

Remove from heat and cool to lukewarm.

In the meantime, measure into a large bowl ½ cup lukewarm water

1 teaspoon granulated sugar and stir until sugar is dissolved. Sprinkle with contents of 1 envelope Fleischmann's Fast Rising Dry Yeast

Let stand 10 minutes, THEN stir well, Stir in lukewarm milk mixture.

Stir in

- 2½ cups once-sifted bread flour and beat until smooth and elastic; stir in 1½ cups lightly-packed shredded old cheese

Work in

- 2½ cups more (about) once-sifted bread flour

Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough. Cover and set dough in warm place, free from draught, and let rise until doubled in bulk. Turn out dough on lightly-floured board and knead lightly until smooth. Divide into portions and finish as follows:

1. CHEESE LOAF

Shape half a batch of dough into a loaf and fit into a greased bread pan about 4½ by 8½ inches. Grease top. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 40 minutes—cover loaf with brown paper during latter part of baking to avoid crust becoming too brown.

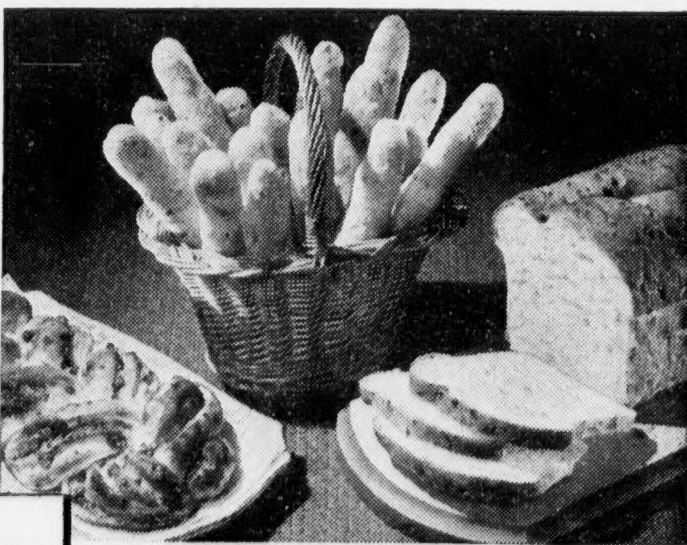

2. MARMALADE BRAID

Roll out a quarter of a batch of dough into an 8-inch square on a lightly-floured board; loosen dough. Spread with ¼ cup marmalade and sprinkle with ¼ cup chopped nuts. Roll up jelly-roll fashion; seal edge and ends. Roll out into an oblong 9 inches long and 3 inches wide; loosen dough,

Cut oblong into 3 lengthwise strips to within an inch of one end. Braid strips, seal the ends and tuck them under braid. Place on greased cookie sheet. Grease top. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 20 minutes.

3. CHEESE BREAD STICKS

Cut a quarter of a batch of dough into 12 equal-sized pieces and roll, one at a time, into slim strips about 7 inches long. Brush strips with water and roll lightly in cornmeal. Place, well apart, on greased cookie sheet. Cover and let rise until doubled in bulk. Bake in a moderately hot oven, 375°, about 10 minutes.

Raspberries Grow Well In Northern Sask.

Raspberries can be grown very successfully in most areas of northeastern Saskatchewan, and it is a pity that so few farmers and townspeople grow them in their gardens. Perhaps it is because the proper varieties are not used.

In selecting raspberry varieties, hardiness cannot be overlooked, particularly if winter protection is not planned. Hardiness is not so important if the grower is prepared to give some protection each winter. Yielding ability and fruit quality are all important as well as the ability to resist diseases and insects. Where the fruit is to be used in the home, shipping qualities are not overly important.

More than seventeen varieties of raspberries have been tested at the Melfort Experimental Station, reports Horticulturist R. H. Anderson, and information collected over a period of several years would indicate the following:

Honey King has been the hardest of all varieties and has withstood severe temperatures without protection. It is a heavy producer but lacks flavor, quality and size of fruit. It is quite resistant to diseases.

Chief has been semi-hardy and only during severe winters has it shown moderate cane damage. Although not as heavy a producer as Honey King, it yields well. The berries are medium large, quite firm and of excellent quality. It is recommended for general use in northeastern Saskatchewan.

Viking is a tall growing variety and produces large canes. The canes are not hardy and therefore require protection during most winters. This variety is highly recommended to growers who plan to give winter protection. The berries are large, and of excellent quality and flavor. The plants are heavy producers under normal conditions and have considerable disease resistance.

Gatineau, Trent and Ottawa are satisfactory yielders of large fruit. These varieties, however, lack the hardiness of Chief and are below the quality of Viking. They are also less resistant to certain raspberry diseases.

Herbert has not produced as well as the above named varieties. The fruit is large, juicy, of good quality and compares favorably with Viking in flavor. The canes are not as vigorous as Viking and they also require winter protection.

Rideau, Sunbeam, Newman, Ruddy and Latham have not produced well under conditions experienced at this station.

Says Girls Entitled To Courting

SALEM, Ore.—Courtship is reason enough for a girl to quit her job, says the Oregon unemployment compensation commission.

An engaged girl resigned her hospital post because her irregular hours didn't give her enough time to see her fiance. The commission held that she quit her job for a good reason and was entitled to unemployment and compensation. It observed:

"Any young woman is ordinarily entitled to reasonable opportunity to be properly courted during the engagement period."

HERE'S HEALTH

Weaving may be lots of fun
When done with wool and loom,
But weaving through the traffic run
May lead but to the tomb.

The long-tailed shrew is the tiniest mammal. 3082

Alberta's Most Modern "Pig Factory" At Camrose

Shown above is the new interior of the John Marek and Son's pig barn. This newly opened enterprise consists of a huge barn 34 feet by 156 feet, of timber rib construction, that is equipped with forced air heating, conveyor belt for removing manure, and forty farrowing pens. Twenty double pens are located on each side of the centre aisle, and the forced air heating unit is installed in the floor. The new piglets can snuggle up to the warm dry heat, such as the group in the inset, cutting down the winter mortality rate among litters due to chilling and pneumonia. This barn was put to use shortly before Christmas with the first litter being born on Christmas Day. An air conditioning fan draws all the foul air out of the barn, circulating fresh air from the outside. The air is humidified, passing through the humidifier in the forced air furnace in the basement. At present time there are 373 young pigs which will be moved to

separate pens when they are between six to seven weeks old and weaned. Electricity makes the running of this business almost a one-man proposition. The furnace has an automatic stoker operated electrically. The huge conveyor belt that runs around the perimeter of the floor is also an electrical set-up. An automatic thermostat keeps the temperature in the barn at a consistent 72 degrees, day and night. Water is piped into each pen from the electrical pressure system, operating on a gravity flow principle. Feed will be ground and mixed with the aid of electrical power. Rural Electrification has made this project an economic possibility for, in the cleaning of this barn alone, the labor of four men is saved. The conveyor belt makes the complete circuit of the pens, depositing the manure into the automatic loader which, in turn, deposits the manure in the truck.

—Photos courtesy of Camrose Canadian

An exterior view of the south end of the Marek barn showing the automatic electric manure loader dumping into the truck. Farming in pigs with automatic barn cleaning system could not be possible without the aid of electricity. The Marek project is located on the site of L. C. Anderson's cleaning plant, and was erected in the fall of last year. John Marek and his two sons, Roman and Leon, are the enterprisers in this small industry. Roman attended university, and Leon is finishing up his last year of High school. Dr. Harold Freden, geneticist at the Lacombe Experimental station, pronounced this factory one of the finest he had ever seen. White-Yorkshire pigs are Marek specialty at present, although they haven't as yet adopted the theory of Advanced Registry with their breeding line.

TRY AND STOP ME!

By BENNETT CERR

"The two qualities that stand a businessman in best stead," Andrew Carnegie told a group of high school grads, "are honesty and sagacity. An honest businessman never breaks his word. A sagacious one never gives it."

It happened, swears one of Atlantic City's prettiest publicity agent, at a plushy store on the boardwalk. A silly girl stole four bottles of perfume under the very eyes of a gendarme, and was promptly arrested for fragrancy.

Old Mr. Rappaport had never been a patient in a hospital before, and he decided he liked it. A pretty nurse waited on him hand and foot, and doctors kept popping in all day to ask him how he felt. When he finished dinner, the nurse removed the tray, then popped two downy pillows under his head. "There, Mr. Rappaport," she murmured, "are you comfortable?" Well, allowed Mr. Rappaport cheerfully, "I make more than anybody else in the family."

A gimlet-eyed lady motorist has at least four driving mishaps a week. To hear her tell it, they're always the fault of other stupid drivers. She went too far one day, however, and backed her jalopy smack into a tree in front of the court-house. The reverberations hadn't died down when her shrill voice was heard instructing her husband: "William, get the license number of that tree!"

On The Side - By - E. V. Durling

Haircuts priced on a time basis is an idea the British barbers are flirting with. Cheapest haircut to take 10 minutes. Next in quality to take 15 minutes and the top price to be paid for a 20-minute haircut.

Varying Reactions

"It must be allowed," said Macauley, "that there is nothing more beautiful than a beautiful woman." With that I agree. I also share the feeling of the man who wrote the poem starting, "My heart leaps up when I behold a blue-eyed blonde passing by." I am also completely in accord with the disapproval of the man who was so indifferent to feminine pulchritude that it was said of him:

"A red-haired chorine
By the floor show's brim
Was just a red-haired chorine to him
And nothing more."

Such Is Fame

Christine Martel, 18-year-old French girl who won the beauty contest title of "Miss Universe". This triumph brought her, among other things, a film contract and indirectly a wealthy husband. Christine recently became the bride of Ronald Marengo, son of a Stockton, Calif., department store owner. Eleanor Tennant, brilliant tennis instructor, has been the coach of two world's champions, Alice Marble and Maureen Connolly. Irving Berlin, celebrating his 50th year as a successful song writer. Irving began his composing career when a singing waiter at Mike Salter's Place, which was at 12 Pell St. in the Chinatown section of Manhattan.

:: GEMS OF THOUGHT ::

GIFTS

A little given seasonably excuses a great gift.—George Herbert.

The memory of the Bethlehem babe bears to mortals gifts greater than those of Magian kings, — hopes that cannot deceive, that waken prophecy, gleams of glory, coronals of meekness, diadems of love.—Mary Baker Eddy.

Sometimes that which is given with a kindly hand is more acceptable than what is given with a full hand.—Proverb.

That which is given with pride and ostentation is rather an ambition than a bounty.—Seneca.

Presents which our love for the donor has rendered precious are ever the most acceptable.—Ovid.

Give what you have. To some one it may be better than you dare to think.—Henry W. Longfellow.

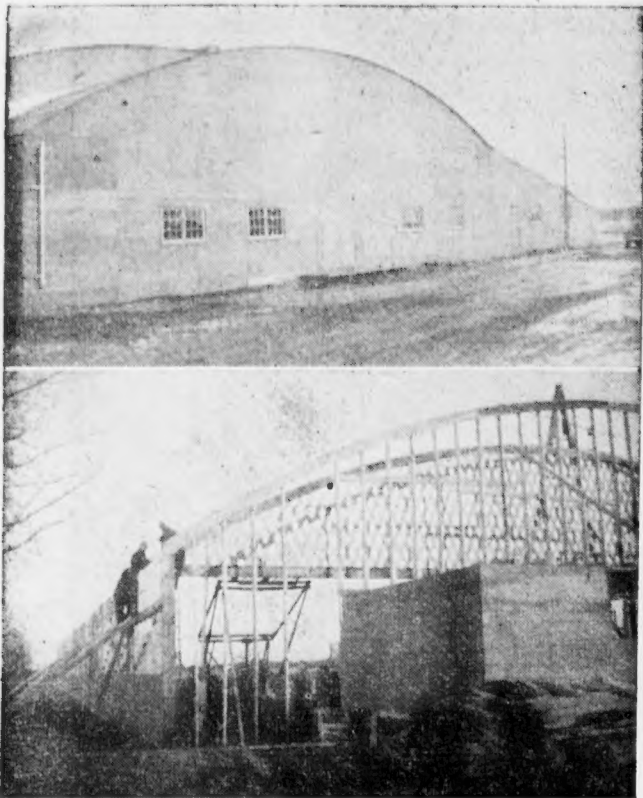

World Happenings In Pictures

ROCANVILLE'S NEW RINK—Top picture is front view of the new \$20,000 skating and curling rink recently opened at Rocanville, Sask. Bottom shot shows an early stage of the work, with the first big rafter safely up in place, hoisted by tripod and farmhand.

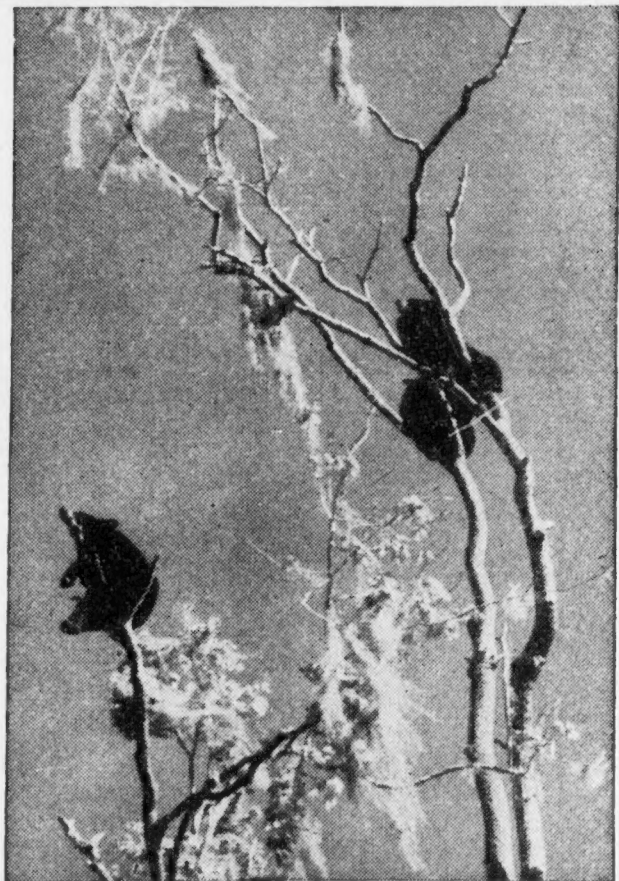

A ROLLING "BATTLESHIP" is being tested by the U.S. Army on the beaches of Le Verdon, France. These two photos give an idea of the size of the giant amphibious landing craft. It has four tires the size of the one shown at left which dwarfs the U.S. and French Army officers inspecting it. Each wheel has its own motor, which also turns twin screws for pushing the craft through the water. The craft has a speed of seven miles per hour on land and 10 m.p.h. in the water when carrying a 60-ton load. The vehicle has already proved its seaworthiness by crossing the Atlantic under its own power.

OFF SIDES—It all goes to prove that it doesn't pay to kick a football into a neighbor's yard. These kids of San Diego, Calif., did that once too often and are now picketing the home of Mrs. Paul Avery in an effort to regain their football. Shown from left to right are: Larry Gore, Betty Stone and Dennis Bolger.

PUP AND CUP—Marine Sgt. Thomas L. White of New Haven, Conn., proudly holds "Muldoon," winner of a dog contest recently held by the 1st Marine Division in Korea. "Muldoon" is a "small-scale St. Bernard," which probably explains the tiny bottle of brandy hanging from his neck.

REACHING FOR THE SUN are Moe and Flo, two Himalayan bears at Ponce de Leon Springs near Deland, Fla. The frisky youngsters appear to be bearing up well under the strain of frolicking in the tree tops—or trying to get away from people.

THE BIG SQUEEZE—Gripping the steering wheel with one hand, Charles Hancock is trapped in his car after it was squeezed between two street cars in Washington. Hancock suffered only minor injuries.

SURFS HER RIGHT—Publicity men at St. Petersburg, Fla., are wondering why impish Ann Hart prefers a mooring stanchion to a swimmer. But they aren't complaining as long as she offers such a lovely portrait.

DREAM COME TRUE—ALMOST—A small boy's dream of piloting a rocket ship comes as nearly true as science permits for seven-year-old Neil Smith of Minneapolis, Minn. Neil got his big chance to operate ultra-advanced flight controls when an aeronautical engineering laboratory in Minneapolis invited the sons of technical employees to visit the plant.

(An official department of Sports College)

Conducted by Lloyd "Ace" Percival

Hockey Hints On Passing

In making a sweep pass, the player moves the puck towards the direction he wishes it to go with a smooth, sweeping motion, avoiding any quick, jerky action. The blade of the stick should follow through along the ice so that the pass will not be lifted.

Many good play possibilities are spoiled because the puck is lifted unintentionally. The player should make sure to check his follow through at all times. If the blade of the stick follows through along the ice after the puck, the puck cannot be lifted off the ice. This is an easy thing to forget in the excitement of the play when an opportunity to pass suddenly comes up. The player is inclined to just make the pass and not think of his technique.

The sweep pass is used when deception is not an important factor or when the puck-carrier has lots of time to set up the pass. The blade of the stick should always follow through in the direction the pass is intended to take. This is an important point to remember if the pass is to be accurate. Aim your follow through at the target to which you are passing.

Play Them "Loose"

In the Corners

When guarding a man who has the basketball in the corner, play a fair distance away from him so that you can block any attempt he makes to pivot around you. Keep him hemmed in and force him to shoot from the side.

It is much better to do this than to let him get by you and go right in for the basket. Try to block his shot but make sure he doesn't get past you with the ball. A shot from a poor, side angle is less dangerous.

Regular Routine for Feeling "Ready"

Some athletes have the mistaken opinion that sleeping late on the morning of a game will give them added pep during the game. Actu-

ally, this usually works just the opposite. By upsetting the regular routine of the body, the athlete is more likely to feel a little sluggish and will not be able to untrack himself as well. The procedure on the day of a game regarding sleep, eating and elimination should be kept as close to normal as possible. A plentiful supply of non-fibrous foods (milk, cheese, eggs) are important at this time. Use honey as your sweetener.

The mangosteen, an East Indian fruit tree, grows from 25 to 30 feet high, has dark green foliage and looks somewhat like a rubber tree.

WEEKLY BIBLE COMMENT

HERITAGE OF LIBERTY GIVEN TO WORLD BY JEWISH PEOPLE

The story is well known how Jacob and his great company went down to Egypt and flourished under the power and patronage of his illustrious brother, Joseph.

But it is a story that cannot be too well known.

Trouble began for these people in that foreign land when there arose "a pharaoh, who knew not Joseph." Racial and religious prejudice, still rife in our own supposedly enlightened environment, soon wreaked its havoc on the Jews.

Great works of ancient time soon became symbols of injustice and oppression. Forced to make bricks without straw, the remnants of those who had come to

Egypt seeking food were cast into bondage, suffering cruelly.

Later, a man, foster son of the palace, renounced his foster mother and his prospect of ease and power to share the affliction of his people. He led them out of bondage toward freedom.

But it was, as we know, by no means as simple as that. Hardships, discouragements, rebellious spirits and yearning to turn back marked the way until the freedom of Canaan was won.

Out of that unpleasant march came what shines with especial glory—the conception of liberty enshrined in the ancient Jewish Scriptures.

In a world marked with slavery, it is remarkable how the Jews designed laws and regulations to protect the community against slavery and the individual in his rights.

One cannot go into this fully here, but one can point to the land's laws designed to prevent serfdom. There was the law which protected debtors from becoming permanent slaves to their creditor. There were the Cities of Refuge where one who had inadvertently injured another could go for safety.

The heritage of liberty that the world owes to the Jews is immense. Unfortunately, the world has never fully appreciated it.

The average per capita income of individuals is greatest in the United States with \$1,798, followed by Canada with \$1,238 and Sweden \$1,008. Average per capita income of persons in China is \$15.

Kitchen Meditations

By JANE DALE

THREE PAIRS OF SHOES

Three pairs of shoes, badly scuffed and worn. Beneath the kitchen table stand in a row: The big ones, the middle ones and the littlest pair, Belong to Freddie, Ann and wee Joe.

How many miles a day do those shoes race

When on those sturdy adventurous feet?

Freddie dares to go anywhere out of doors—

O'er the garden, over fences and sometimes off the street

Followed faithfully by five-year-old Ann—

Brave as the bravest with Freddie in the lead;

And tagging along behind, content to a slower pace

Goes little Joe. Why hurry when there's no need?

Now standing upright and looking sadly forlorn

Three pairs of shoes have a rest from childish play.

Freddie, Ann and Joe, little angels while asleep

Will soon be up to greet another busy day.

MANY DANCERS

WETASKIWIN, Alta. — The crowd at the square dance in the drill hall here was estimated at 1,400—making it probably the second-largest dance of its kind ever held in Alberta. Officials said the record was set during Calgary's Stampede corral last year.

Popular Saskatchewan Doctor Recalls Events In Thirty-Two Years Of Prairie Practice

WEYBURN.—For more than a third of a century Dr. James McGillivray, has battled prairie blizzards, snowdrifts, dust storms and axle-deep mud to reach his isolated charges in southeastern Saskatchewan. A thick record book on his desk tells the story of the 3,000 babies he has brought into the world, among them so many sets of twins he can't remember half of them.

Working by the light of a kerosene lamp in a farm kitchen, he has performed dozens of emergency operations and saved the lives of more people than he can recollect.

Since he made his first rush call in a buggy to deliver a baby near Weyburn 32 years ago, "Doc" McGillivray has watched the transition from the horse-drawn age to the automobile era. He has ridden to answer the call of illness in every conveyance from a shake-down cutter to a one-man Indian snow cycle. In the days

when the horse ruled the road, he travelled as much as 125 miles in 24 hours by horse and cutter.

"Although I'm half ashamed to admit it, I used the same team for the entire distance," he says. "It was a case of pressing necessity, though, and I couldn't turn the patients down."

Dr. McGillivray has a province-wide reputation as a surgeon ready to leave his home for an emergency, in bad weather or good. Once he travelled to Souris, Man., to treat a patient, a distance of more than 250 miles.

Dr. McGillivray says he gets a lot more sleep since the horse yielded to the automobile.

"I used to figure on at least three nights a week out of bed," he says. "The pioneer farmers of the west were the most unselfish and neighborly people in the world. I had a farmer get out of a warm bed in the middle of the night dozens of times and lend me his best horses."

A trip Dr. McGillivray took on a railway speeder still rates as his coldest jaunt. He had to reach a patient and roads were impassable. When the open speeder reached its destination he was so cold he couldn't move his arms. A prospective father delivered his own child with the instructions the doctor muttered through chattering teeth.

A blizzard and snow drifts almost separated Dr. McGillivray from his patient recently.

His snowmobile struck the drift five miles short of his destination, leaving him stranded. He left the machine and started on foot, finally reaching a farm house. Finding it deserted, he smashed the door down with an axe, used the telephone to call a team and sleigh, then continued his journey to reach the patient in time and saved his life.

Later he re-visited the farm house and paid for the smashed door.

Dr. McGillivray came to a Saskatchewan homestead with his parents leaving Thurso, Que., in 1899. Weyburn then consisted of a railway station, a water tank and one tent. After attending school here, he continued his education at the University of Toronto.

One case Dr. McGillivray says he won't forget concerns the notorious Nelson Sammy who shot and killed his wife, her parents and an RCMP constable.

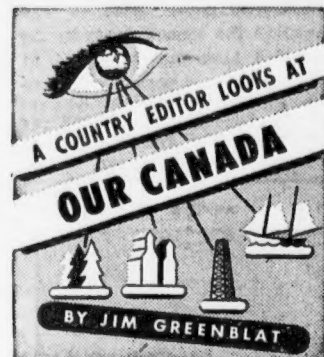

Just before the officer fell dead, he fired a bullet into Sammy's chest which threatened to help cheat the gallows. Dr. McGillivray was called in and pulled Sammy through. Sammy subsequently paid the penalty for his crimes.

Range Horses Worry Stockmen

The British Columbia Beef Cattle Growers' association is concerned about a provincial government decision to halt its efforts in removing range horses from crown lands. The cattlemen feel that the horses will multiply in numbers if not interfered with, and pastures will suffer accordingly.

At one time, these horses were rounded up periodically, and the best of them sold. This is no longer done because of the drop in value of wild horses. The government men were then directed to shoot these animals on an organized basis, but now the government has decided to withhold further support. The ranchers feel they and other groups concerned should have been consulted because they have special knowledge of the problem. These wild horses could cause a lot of trouble if their destruction was stopped and they were allowed to increase, the cattlemen agreed.

This matter was considered at a meeting of the directors in Kamloops recently. The annual meeting of the B.C. Cattle Beef Growers' association will be at Clinton, May 29th.—Exchange.

THE TOWERING tresses of this French beauty are supposed to emulate the extravagant coiffure of Marie-Antoinette. A Paris hair dresser used plastic fibers to create the ceiling-sweeping hair do. It will be among others to be shown at the coming International Exhibition of Feminine Beauty in London, a benefit for the Royal Hospital for Incurable Diseases.

Scholarships For Rural Students In Alberta

The following is a brief outline of the provision of these scholarships.

The Alberta Wheat Pool offers annually, two scholarships of \$500 each to two students from Alberta High schools; one to a student whose home is in the southern half of the province and one to a student whose home is in the northern part of the province and they are tenable in any undergraduate degree program.

The amount of \$500 will be paid to each student during each of the undergraduate years up to and including five years providing that he or she maintains an average standing of not less than 65 per cent. in each year.

These scholarships are open to students whose homes are on the farm and the award will be made on the basis of a satisfactory record in the grade twelve examinations for senior matriculation and the need for financial assistance.

For the purpose of this award, the southern part of the province shall be defined as the part of Alberta inclusive of and south of Township 44.

Application forms are available from the Registrar, University of Alberta, and should be received by August 10th.

Garden Notes

For Amateur Gardeners

Take Your Time

Nothing is gained and much can be lost by rushing the season and trying to work soil while it is still damp and sticky. While most vegetables and flowers can be planted a little later than usual and will do almost as well, if we put them in too soon they will either freeze to death or get such a set back that they will be permanently checked. But, of course, there are a few exceptions to every rule. Some very hardy things like sweet peas, grass seed, the first garden peas, shrubbery, trees and many herbaceous perennial roots, should be planted in the spring just as soon as the soil can be dug without puddling. These are cool weather loving plants and they must get well started before the summer heat. In very mild parts of the country these things are planted or set out in March and elsewhere not later than April or early May.

Easy To Be an Expert

One of the things that makes gardening such a fascinating hobby is the room for specialization and original work in literally hundreds of directions. And the cost is nominal, a few cents for seeds, and pleasant exercise. Anyone can soon become an expert along certain lines of his own choosing. Some people like to concentrate on rock gardens, others on window boxes, or an extra fine lawn of, say bent grass. Others go in for rare dwarf plants or special borders of various distinctive colors. Still others accept the challenge of shaded quarters and with tuberous begonias and other plants that actually prefer to keep away from the sun. The seed catalogues will help in choosing plants for any of these special purposes and, of course, for the more advanced there are all sorts of special literature. In this sort of thing it will help to choose a plant or line that seems to have a special liking for the soil or other

conditions available and, of course, it should be more or less a personal favorite, too.

A Big Show

One doesn't need a lot of time, money or skill to make a big splash with flowers even around a summer cottage, country lane or other place where a lot of regular and particular care is impossible. The best plan, in any of these cases, is to stick to things like petunias, nasturtiums, cosmos, marigolds, zinnias and similar plants which are not only easily grown but which also will bloom steadily for weeks. With only little care at first these will practically look after themselves. It is best to have solid beds of one flower, though not necessarily the same color, for the showiest results. A long bed of petunias about three feet wide, will set off any driveways, and roughly circular beds of zinnias, marigolds or some of the smaller things, will make a wonderful show. Then for the smaller garden there are all sorts of tiny flowers, like alyssum, portulaca, poppies and similar flowers which thrive even in poor soil and once well started will crowd out weeds and go on blooming until fall.

For an Early Start

One can safely rush the season for a few early tomatoes, hills of melons or cucumbers by planting or setting under special oiled paper, plastic or glass caps. Most seed stores carry these things which are about the size and shape of the old fashioned straw hat. These will furnish ample protection against even severe frost and by using them one can get a few tender things started two to three weeks ahead of the usual time.

Queen Elizabeth Congratulates Bible Society

"A message from the Queen congratulating the British and Foreign Bible Society on their third jubilee was read at a commemorative meeting in Melbourne.

"The Queen, who is a patron of the society, spoke of the completion of 150 years of 'vigorous and constructive work.'

"My family have always taken a deep interest in the work of the society," she went on, 'and I pray that in Australia and throughout the world your labors in fostering a wide and deeper knowledge of the Scriptures may meet with continuing success.'

"The anniversary was remembered by the auxiliaries of the Bible Society in England and Wales and in other parts of the world. At the Festival Hall, London, 3,000 children attended a meeting at which was cut a birthday cake, weighing 950 pounds, a present from well-wishers in Australia."—London Times.

The 150th anniversary of the British and Foreign Bible Society was observed throughout Canada in churches from coast to coast on Sunday, March 7. The annual meeting of the Upper Canada Bible Society, held in Convocation Hall, was part of the observance. Word has just been received from Montreal that a great service of Thanksgiving was held there in the Salvation Army Citadel, at which members of all the Protestant churches in Montreal were present. In Quebec city there was an extremely well attended service of Thanksgiving in the Anglican Cathedral at which the preacher was the Rev. J. S. Thomson, M.A., D.D., LL.D., Dean of the Divinity Faculty of McGill University, Montreal.

Helpful Hints

To remove milk stains from glasses, fill them with warm water and a little baking soda and let them stand a while.

To keep flies and other insects off paint before it dries, add one or two tablespoons of oil of citronella or oil of wintergreen to each gallon of paint.

Waxing the slats of venetian blinds makes dusting easier.

Use an ordinary paint brush to dust furniture if it has a curved design. The brush does a good cleaning job and saves time.

::: APPETIZING RECIPES :::

Dip fish fillets in beaten egg and cornmeal, then fry, turning only once during the cooking to keep fish from breaking.

PAN FRIED FISH

Cut fillets into serving sized pieces and wipe dry with cheese cloth. Dip each piece in beaten egg then cornmeal. Fry in a pan with very hot fat.

Baked Fillets With Sour Cream
Thin slices of lemon and onion 1 to 1½ lbs. fish fillets, or 2 lbs. fish steak 1" thick, salt, pepper, 1 cup sour cream, paprika.

Cover bottom of greased baking

dish with slices of lemon and onion and arrange fish on top. Sprinkle with salt and pepper. Add lemon slices. Bake in hot oven 500 degrees F. allowing 10 minutes per inch thickness of fresh fish or 20 minutes per inch thickness of frozen fish. When the fish flakes easily with fork but is still moist, spread with combined sour cream and salt, sprinkle with paprika, return to oven and broil until fish is browned. Yields 4 servings.

OUR COMPLETE SHORT STORY —

Tea Is A Comfort

By Wanda Moore

MADGE DAY looked at the drab rug. Drab furniture went with it and drab people. And she was it—drab people. She did not want Tad's mother to see any of it.

Any minute now Mrs. Trent would be at the door. Mrs. Trent, the mother of the boy Madge's daughter was going to marry. She would come in, and she would look at the drabness of Madge and of the room and she would say polite things and go away and try to take her son out of Lynn's life. Her only son should have something better than drabness. Perhaps she would show her

surprise that she had even considered Lynn suitable for Tad, but Madge doubted that because Tad was so sweet, so good to Lynn that his mother would know how to hide her surprise and would gently withdraw, forgetting that Lynn was color and life and goodness. That even the room could be beautiful with Lynn in it.

Fervently, Madge wished that she were not so worn, so tired from making ends meet when there were no ends, only frayed pieces of life that she seemed unable to draw together any more. She wanted Lynn to be happy, and she knew that Lynn's happiness was with Tad and that losing him was not something that she would "get over in time." Silly phrase!

Madge shook herself and rearranged the tea things on the worn tray. Everything ready except to make the tea. At least she would have the comforting ritual of tea to keep her from feeling too deeply the disapproval of Tad's mother.

The bell rang. For a minute Madge did not move. Then she straightened her shoulders inside her afternoon dress and walked slowly toward the door. Her fingers fumbled with the knob. Then she and Mrs. Trent were facing each other.

Mrs. Trent smiled. "Mrs. Day? I'm Mrs. Trent," she said, and Madge looked from the deceptively simple expensive coat to the matching hat and back to the smiling face that looked surprisingly like Tad, and she could think of nothing to say because she kept wanting to say, I knew it would be like this.

Mrs. Trent's smile began to fade. "You are Mrs. Day, aren't you?"

Madge swung the door wide. "Oh, yes," she said swiftly. "And you're Tad's mother. Forgive me. I was just thinking how much you look like him. I would know you instantly. Come right in."

But when Mrs. Trent was settled in the worn tapestry chair across from her in the living room, the drabness of the room had given way to a complete lack of color, and Madge knew that she was just as colorless as the room.

She saw a questioning look appear and then hide in Mrs. Trent's eyes before Mrs. Trent said, "I am sorry that I did not get around to meet you before. I know that being busy is no excuse."

No, thought Madge, you will always regret not having come around sooner so that you could have stopped Tad before he started to talk marriage with a

girl from surroundings like these. She forced a smile. "I am sorry, too," she said. She was on her feet. "I'll just get the tea. Tea is a comfort." She fled from the room. What a silly thing to say, she thought.

Now they sat with steaming tea cup in their hands. A click of the other's cup against the saucer drew Madge's eyes to Mrs. Trent's hand. It was trembling, ever so slightly, but trembling.

Why should her hand tremble? Madge wondered. All she was going to do was take the world away from Lynn. She stiffened. I won't let her. She raised her eyes to Mrs. Trent's face. There was a lost look there. The same look that Madge had when the frayed ends would not meet.

Mrs. Trent said, "I know it is terribly hard for you."

Madge nodded. "Yes. What matters is what is best for Lynn. And Tad," she added quickly.

Mrs. Trent nodded back. "For both of them, of course," she said. "For both of them."

"Lynn's happiness means everything to me," said Madge.

A faint light began to glow in Mrs. Trent's eyes. "Whatever she decides?" she asked.

"Yes," Madge said softly. "She loves Tad, Mrs. Trent. She will never be happy without him."

Carefully, Mrs. Trent set her cup on the tray. Then she began to laugh.

Madge could see nothing funny about love—not the kind Lynn and Tad had. What was the matter with Mrs. Trent? "It isn't funny," Madge said.

"Oh, yes it is," and Mrs. Trent dabbed her eyes with a lace handkerchief. "Now I know why you looked at me that way when I came to the door. You were as afraid that I wouldn't like you as I was that you wouldn't approve of me." She leaned forward. "Mrs. Day, I want a daughter, and I was so afraid that you would feel that you could not share Lynn with Tad and me."

Madge was laughing now. "And I looked at this drab room and me . . . oh, no. What fools we can be sometimes."

And they settled back to enjoy their second cup of tea, wishing that Tad and Lynn were there to share this minute with them. (Copyright Wheeler Newspaper Syndicate)

Says Tunnel Cheaper Than Open Track

VANCOUVER.—A 25-mile tunnel through the mountains immediately north of Vancouver has been proposed to bring the provincially owned Pacific Great Eastern Railway into the city.

An engineer, who asked to remain anonymous, said a tunnel would be less costly in the long run than open track along the shores of Burrard inlet and through heavily populated West Vancouver. The latter route, proposed by the government, has been bitterly opposed by residents of the municipality.

Banff Indian Days Slated July 15-18

EDMONTON.—The Banff Indian Days Committee has released its first folder to promote its 1954 activities, which will be held from July 15th to 18th. This is a special occasion for the festival as it marks the 65th anniversary of the Indian Days. That would mean that Banff (Canada's first national park) had only been in existence for four years when the first Stony Indian get-together was held.

The four-page brochure gives an excellent account of three-day activities and should prove very popular with visitors to Alberta.

IMPROVED METHOD

EDMONTON. — Evidence suggests that children in the present school system get a more thorough grasp of the fundamentals of mathematics than in former years, said Prof. W. Eric Hodgson, of the University of Alberta.

BUSY WORKER

VANCOUVER. — Mrs. Hazel Moran, who has been blind since she was eight years old, has become a successful therapist working with her husband, a registered masseur. She also sings in a choir and makes handicrafts. 3082

Peanut Butter Pinwheel Loaf

Mix and sift into a bowl, 3 c. once-sifted pastry flour (or 2½ c. once-sifted all-purpose flour), 5½ tps. Magic Baking Powder, ¾ tsp. salt. Cut in finely 7 tbs. chilled shortening. Combine ¾ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork. Knead for 10 seconds on lightly-floured board and roll out to 1½" thick rectangle, 8½" along one side. Cream together 1 tbs. butter or margarine, ¼ c. peanut butter and ½ c. lightly-packed brown sugar; sprinkle on rolled-out dough. Beginning at an 8½" edge, roll dough up like a jelly roll and place in a greased loaf pan (4½" x 8½"). Bake in a hot oven, 400°, about 45 minutes. Serve hot, cut in thick slices, or cold, cut in thin slices, lightly spread with butter or margarine.

Always Dependable

Jane Ashley Says

"Try my favorite recipe for the month"

SALMON CASSEROLE

- 4 medium onions, quartered
- 1½ cups water
- 1½ cups milk
- 2 tablespoons butter
- 1 teaspoon salt
- ¼ teaspoon pepper
- ½ cup BENSON'S or CANADA Corn Starch
- ¼ cup water
- 2 cups canned peas
- 2 cups canned salmon
- 1 cup salted cracker crumbs

COOK onions in water until tender. ADD milk, butter, salt and pepper; heat to boiling. MIX BENSON'S or CANADA Corn Starch with ¼ cup water to make a smooth paste. ADD to hot liquid gradually; cook until thick and smooth, stirring constantly. ADD peas and salmon; mix well. POUR into greased 1½-quart casserole; sprinkle crumbs over top. BAKE at 350°F. 40 minutes or until done. YIELD: 6 to 8 servings.

MACDONALD'S
Fine Cut

Makes a better cigarette

Level Land

Pastor and Mrs. Cooper of Calgary were visiting at the home of Mr. and Mrs. Joe Stern. Pastor Cooper was the guest speaker at the S.D.A. Church March 27th.

Amarylis Gramms and Geraldine Roth of Canadian Union College were home with their parents during the March 27 weekend.

Mr. and Mrs. Welke of Leduc were visiting with their daughter, Mrs. Glen Triebwasser and Mrs. Earl Lang for a few days last week.

Pastor and Mrs. L. H. Daives of Calgary were visiting with friends of this district March 27. Pastor Daives also brought films along for a program which was sponsored by the S.D.A. Dorcas Society March 27 at 8 p.m. in which the Dorcas presented to Mrs. Esther Triebwasser a triple set of travelling bags. These were paid for by the people present that night. The proceeds did not come out of the Dorcas Fund. Mrs. Esther Triebwasser will leave for Walla Walla, Wash. for a few months to visit with her sister, Anna.

Mr. and Mrs. Martin Tschritter of Nightingale were in collision with a car coming home from Calgary April 3rd. Mrs. Tschritter was killed. Mr. Tschritter was resting in Calgary hospital with a broken leg. Three persons from the other car are in hospital. No other information was available at time of mailing.

Adolph Comm of Leduc was in a collision two miles south of Leduc with a C.P.R. train. Mr. Comm is well-known to people of this district and is in the University hospital, Edmonton. Word of his condition has not yet been received.

A. A. Roth, while being on the platform in Calgary Church April 2 passed out and was taken to the General hospital. We're happy to report that he was released the next day.

On April 3rd a program was given in Western Canada High School Auditorium in Calgary by the Seventh Day Adventist Young People's Federation. Churches present were the S.D.A. Church of the Level Land district the Acme S.D.A. Church, Olds S.D.A. Church, the Calgary S.D.A. Churches, Cluny S.D.A. Church and surrounding districts of Calgary. The program started with a Sabbath School at 10:30 with Dale Vieger in charge and Elmer Koronko in charge of music. At 12 a Church Service with the guest speaker D. L. Michael of Oshawa, Ont. of the S.D.A. Canadian Union Conference. Mr. Michael is in charge of Dept. of Public Affairs. A baptism was held at the S.D.A. Central Calgary Church at 3 p.m. At 4:30 an Allegory in song was presented mostly by the Calgary Central Church with Mr. Dale Visgar in charge. At 7:30 a musical program was given by the Canadian Union College. Pres. H. T. Johnson of the College introduced all those who took part. Mr. P. G. Miller, High School principal and Mr. W. Haynes, the vocal teacher and Mr. J. Sheldon, music teacher, Ralph Copland of Golden, B. C., Lindburg Galimore of Jamaica, Girls Trio, Alice Jeweks of Kelowna, B.C., Betty Hendrick of Saskatoon, Ruth Blaisdell of Kelowna; the Level Land Trumpet Trio, Marjorie and Larry Leiske. Bob Huether and Glenda Gimbel of Beiseker. The program was given in two parts—seven sacred numbers. A life story and why he attends Canadian Union College by Lindburg Galimore of Jamaica, and seven numbers of secular music.

The program was surely enjoyed by all present and the Western Canada High School Auditorium was well filled in the even-

Tips on Touring

By Carol Lane
Women's Travel Authority

If you're a passenger in a car, you can help the driver and have a more enjoyable trip yourself if you'll follow these rules:—

- (1) Don't open the rear windows. It creates a draft on the back of the neck of those in the front seat.
- (2) Don't lean forward and breathe down the neck of the driver. Just sit back and speak loudly enough to be heard clearly in

front.

(3) Keep small children from climbing over into the front seat, from standing behind the driver, clutching at the back of the seat and blocking his rear vision.

(4) Don't turn on the overhead light at night unless the car is stopped. It will blind the driver.

(5) Don't shout instructions or say anything which will distract the driver, make him nervous or take his eyes off the road.

(6) If you're the "navigator", give directions far enough in advance so that the driver can make the turn easily.

(7) If driving conditions are bad, let the man at the wheel decide whether to push on or stop.

When you're a passenger, remember that it's the driver of the car who is the boss.

WHAT MAKES A TOWN—

It's when you're asked to bake a cake,
Or swing a shovel, or pull a rake,
To help the people build a hall,
And you pitch right in, and don't just bawl,
It's the people that make the Town.

It's when the people of different breeds,
Opposite politics and various creeds,
Push the wheel that's stuck in the ice,
And don't just look and give advice,
It's the people that make the Town.

It's when the people all pull their weight,
And not just sit and swing on the gate,
It's when the people are proud to say,
This is My Town, not, Here I just stay,
It's the people that make the Town.

It's not the buildings that make a Town,
It's not the streets going up and down,
It's not the money that changes hands,
It's not the sidewalks, it's not the lands,
It's the people that make the Town.

So let's resolve this year to take
An interest in things and make
This Town of Ours a worthwhile place,
And not some buildings taking up space;
It's the people that make the Town.

SEEDTIME and HARVEST
By
D. P. J. GREANEY,
Director,
Line Elevators Farm Service,
Winnipeg, Manitoba.

HOW FOR A GOOD HARVEST TREAT YOUR SEED!

In the opinion of leading farmers and agronomists in Western Canada there is no farming practice that will yield as great a return for so small an investment per acre in time, labor and money as seed treatment.

The Need. Recent provincial seed surveys, plant disease surveys and smut tests on farmers' seed samples show that a very large proportion of the seed of wheat, oats and barley sown each year in Western Canada carries smut, or is damaged by threshing or weathering, in sufficient amount to make seed treatment necessary. Consequently unless you are satisfied that your seed is practically free of smut, and undamaged—treat it!

Proven Treatment. The best seed treatments available today for controlling wheat, oats, barley and flax are the organic mercury compounds (Agrox C, Cresan 11, Leytosan, Panagen, etc.). Why? Because they not only give good control of surface-borne smut, and other seed-borne diseases, but also afford some protection to the seed and seedlings against disease-producing organisms that live and overwinter in the soil. The mercury-containing dual-purpose chemicals (Mergamma C, Merlane, and others) are recommended where wireworms as well as smut are to be controlled. Some important points to be kept in mind, however, when treating seed with an organic mercury compound are: (1) Treat wheat and flax at least 24 hours before sowing. (2) Treat oats and barley at least a week in advance of seeding. (3) Avoid overtreatment. Follow manufacturer's directions closely. (4) The organic mercury compounds are poisonous. Handle with caution.

New Circulars. The Line Elevators Farm Service has just published three new circulars dealing with seed treatment. These are: "Smut Control in Wheat", "Smut Control in Oats", and "Smut Control in Barley." Free copies of these circulars can be obtained from local Agents of any of the Line Elevator Companies listed above.
